Detailed Action

This office action is a response to applicant's amendment submitted July 11, 2008 wherein claims 19-21 and 31-33 are cancelled. This application is a continuation in part of US application 10/230671, now under interference, filed August 29, 2002, which claims benefit of provisional application 60/316287, filed August 31, 2001. This application also claims benefit of provisional application 60/498790, filed August 28, 2003.

Claims 1-9 are pending in this application.

Claims 1-9 as amended are examined on the merits herein.

Priority

The US parent application 10/230671, filed August 29, 2002 and the provisional applications 60/498790, filed August 28, 2003, and 60/316287, filed August 31, 2001, upon which priority is claimed fail to provide adequate support under 35 USC 112, first paragraph for the claimed subject matter of instant claims 1-9 and 19-21 of this application because these applications are not seen to disclose any methods of treating scoliotic spines according to instant claims 1-9 or of increasing permeability or cell viability of intervertebral discs according to instant claims 19-21. Thus, the filing date of the instant claims is deemed to be the filing date of the instant application, February 24, 2004.

Reasons for Allowance

Applicant's amendment, submitted July 11, 2008, with respect to the rejection of instant claims 19-21 and 31-33 under 35 USC 103(a) for being obvious over Slivka et al. in view of Sato et al., has been fully considered and found to be persuasive to remove the rejection as the rejected claims have been cancelled. Therefore the rejection is withdrawn.

Applicant's amendment, submitted July 11, 2008, with respect to the rejection of instant claims 19-21 and 31-33 under 35 USC 103(a) for being obvious over Slivka et al. in view of Desrosiers et al., has been fully considered and found to be persuasive to remove the rejection as the rejected claims have been cancelled. Therefore the rejection is withdrawn.

Currently, claims 1-9 are pending in this application and have been examined on the merits herein. These claims are seen to be allowable for the reasons given below:

The claimed invention is seen to be adequately described and enabled by the specification. For example, the treatment of scoliotic spines according to the invention is disclosed on pp. 8-9 of the specification. The examples on pp. 20-29 demonstrate that the claimed treatment increases the stiffness and resistance to bending of the affected spine, parameters that would be expected to reduce or treat scoliosis. Therefore the claimed invention meets the requirements of 35 USC 112.

The claimed invention is also seen to be novel and non-obvious over the prior art. Although certain prior art references such as Slivka et al. are seen to teach a

method comprising injecting a crosslinking agent into an intervertebral disk, The prior art does not disclose a method wherein this treatment is specifically practiced on a scoliotic spine, but rather is directed to treating damaged intervertebral disks, for example slipped or herniated disks. Furthermore, the state of the art for treating scoliosis involves physical reinforcement of the spine such as bracing or spinal fusion. One of ordinary skill in the art would not have considered a method of crosslinking the intervertebral disk to be obviously useful for treating scoliosis. Therefore the claimed invention is seen to be novel and non-obvious over the prior art.

Accordingly, Applicant's amendment submitted July 11, 2008, is sufficient to remove all rejections made in the prior office action as discussed above and to place the application in condition for allowance.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled, "Comments on Statement of Reasons for Allowance."
